

For over half a century, the Volkswagen "bus" has cast a spell on the automobile world, and John LaTorre knows why.

He's put 400,000 miles on them, lived in them, and worked on them in some very inconvenient places and times.

It's the story of how he met the people who drive VW buses, love VW buses, camp in VW buses, repair VW buses, and keep VW buses on the road.

Hop in...it's a thrilling ride, and the journey isn't over!

**"A SIGNIFICANT NEW BOOK**

**for the canon of writings on classic Volkswagen vehicles**

"What's remarkable about Mr. LaTorre's account is...his intimacy with the bus, from his meandering campout adventures on the road to his rewarding yet greasy work in keeping his buses alive... an authoritative read of his hearty passion for the vehicle that became a cultural icon of wayfaring people ...

"Read and remember your own days when a computer chip did not make the machine go."

—Dan Ouellette, author of  
*The Volkswagen Bug Book—A  
Celebration of Beetle Culture*  
(Angel City Press)
